

- Building the Foundations for Lifelong Learning -

Our Vision

Vision Statement

We are living in a rapidly changing and technological world. Society is becoming increasingly diverse; family structures and work patterns are evolving. Bowsland Green School needs to respond by providing an education that will enable each child to utilise a variety of skills and knowledge to meet these challenges with determination and confidence.

Our vision for the future of our school is to continue to aim for higher standards through a broad and balanced curriculum with an emphasis on creativity and team work. We will seek to provide learning opportunities that relate to the real world and build on what children already know.

Our children need to develop skills and attitudes that will enable them to adapt to social situations, develop self-esteem and manage their feelings and emotions effectively. Our school will foster an ethos of challenge and high expectation with an emphasis on personal responsibility and respect and understanding of other's cultures and beliefs.

We believe it is vital to work in partnership with parents, other schools and the local community. We will actively encourage our partners in learning to become involved in the life of the school. Learning is a lifelong process and it is our responsibility as adults to model effective learning and positive relationships; to live and breathe our vision every day. Learning is and will remain our core purpose.

Mission for the School

We will deliver our vision by:

- providing a safe, secure and stimulating learning environment
- prioritising the development of positive relationships
- focusing on the growth of emotional well being
- diverse and stimulating curriculum delivery
- celebrating the achievements of the individual and teams
- developing a reflective and committed staff
- creating an ethos of support, challenge and encouragement to achieve
- establishing learning partnerships between school, home and the community
- celebrating the richness of our multi-cultural society
- working collaboratively towards common goals
